CLAIMS

What is claimed is:

1. A method for accepting an incoming message over a circuit switched network and transmitting it over a packet switched network comprising:

    receiving an incoming call signal along with a inbound address;

    determining a user account and a final address on said packet switched network associated with said inbound address;

    allocating a message processing resource;

    processing said incoming call into a processed message; and,

    sending said processed message to said final address.
